MODULE 5

Special methods of fusion welding

Special methods of welding processes fusion welding

Special methods of welding processes fusion welding

- ▶ Nowadays more and more in practice applying advanced special welding technology.
- ▶ Characteristic advantage of special methods
 - ▶ Less heat input into the weld, which causes a smaller extent transformational change in the welded material.
 - ▶ At these methods are much less affected thermally welded region, and therefore less stress and strain.
 - ▶ Yippee possible to use modern types of welded joints.
